COLLECTION [MODUO](#), [MODUO SHOWER](#)

PRODUCT CODE:

S601-349

Product description

A complete set consisting of a shower enclosure and a shower tray. MODUO shower enclosure has been crafted from durable 6 mm thick tempered glass, ensuring structural stability and safety of using. The glass is equipped with a protective hydrophobic coating CleanPro, effectively preventing the buildup of limescale and impurities. This feature facilitates easier maintenance of the shower enclosure, keeping it clean and pristine. The column hinge creates a smooth surface with the wall side profile and has the function of lifting the door, which extends the life of the gaskets. The innovative hinge mechanism allows you to conveniently open the door to an angle of 180°, however, when it opens to an angle of 90°, it brakes, which provides protection against accidental impact. Double-sided handles made of height-quality metal combine durability and functionality. The shower enclosure is equipped with a functional wall side profile that adjusts to wall unevenness up to 15 mm. Chrome details with a subtly shiny finish emphasize the modernity and minimalist form of the enclosure. Magnetic gaskets increase the convenience of use. The height quality of the product is confirmed by a long-term warranty. Halfround corner shower enclosure 195 cm height, 90 cm wide, with transparent glass. TAKO shower tray, white. It is made of the highest quality acrylic. It has double reinforcement made of resin and fiberglass, which guarantees the stability and exceptional durability of the product. The height of the shower tray is 16 cm. The shower tray siphon is available in the Cersanit offer as a separate element that must be purchased separately.

Technical data

Availability of spare parts (years)	yes (at least 3 years from the end of production)
Cleanpro coating	yes
Depth	90 cm
